

financial services

We provide a wide range of highly professional, highly affordable financial services.

Our approach is direct, transparent and professional: we believe in keeping our clients fully informed and in as much detail as they require. There should be no mystery about the preparation of accounts and management of your finances, just clarity, accuracy, and integrity.

Book-keeping

If your book-keeping is no longer keeping pace with your requirements, Prism Group can provide you with a cost-effective service delivered and overseen by professionals. If you are still keeping the books yourself, or the service you are receiving from outside falls short of our exacting standards, we should talk.

Payroll administration

Few things upset employees more than being paid late, wrong, or not at all. If your payroll is handled in-house or the service you are receiving from outside is simply not up to scratch, Prism Group can help; with up-to-date software and experienced hands there's no excuse for second best.

Tax Returns

VAT. Corporation Tax. Income Tax. Capital Gains Tax. Don't let them frighten you. We'll take the stress out of preparing and filing your returns. We'll help you make advance provision for your tax liabilities, and make sure your returns are submitted on time.

Management accounts

Accurate, intelligent, relevant, digestible information is an absolute necessity. If your management accounts leave a lot to be desired, we can make a real difference to your business. With years of experience, we are experts in providing management teams with information that's actionable, and on time.

Financial Plans

Does your Financial Plan let you say "what if?" and look at alternative scenarios? Is it a useful, living, management tool, or something tucked away in a cupboard and only pulled out if the Bank Manager calls? Every company benefits from a clear, comprehensive, living, automated financial plan: if yours falls short, let's talk. It could throw a whole new light on your business.

If this sounds like the professional input your company needs, we should talk.
